Motivated software engineer, I have extensive experience in HTML5, CSS3, and JavaScript and am dedicated to designing user-friendly interfaces. My passion lies in creating visually appealing and functional websites with a focus on UI/UX design. Additionally, I am well-versed in Java and have hands-on experience working with Android Studio. I am eager to bring my technical skills and design knowledge to a challenging and dynamic environment where I can continue to grow and make a positive impact.

Technical Skills

Likes: HTML5, CSS3, JavaScript, UI/UX, Android Studio, Scene Builder, Java Development, C++, SQL, UML Diagram analysis

Projects

Feb 2023

- **LoveTech** – https://moegrand.github.io/LoveTech/

I developed Lovetech, a website frontend built with HTML, CSS, and JavaScript. The site boasts a clean and organized layout, interactive elements, and a responsive design for fast loading times. Lovetech was a challenging project that showcases my front-end development skills and commitment to delivering exceptional web experiences.

Dec 2021

- **World of Games** – https://github.com/moeGrand/World-Of-Games

The software named World of Games is a digital store that provides a similar experience as Steam. It was developed using the NetBeans Scene Builder. The focus while building the software was on creating an interactive interface that would provide a seamless and enjoyable experience for the users. With its user-friendly design, World of Games offers a platform where users can easily find and play their favorite games.

Education

- **Bachelor in Software Engineering** – University of Jeddah
